

What other people are saying about Intraceuticals

Marian Filali
Professional Makeup Artist
California, USA

"My career as a professional make-up artist took off after doing the Academy Awards in 2005 and since then I have worked with renowned photographers, directors and actors in Los Angeles, Hawaii, Tahiti and Miami.

My main focus has always been how to make the skin vibrant? And that's exactly what Intraceuticals does. It gives that "extra" glow. The combination of Oxygen and Serums is simply genius. The skin becomes moist and supple, wrinkles fill up, and it is a fantastic base before applying make-up. The process is extremely relaxing and the transformation truly magical. My friend Gina Brooke introduced me to Intraceuticals when we contributed on a project with Madonna.

I recently did a treatment on Kimora Lee Simmons and her skin simply radiated. She loved it!

Now I carry the machine everywhere, I even started a trend in Hollywood, the "Intraceuticals Party", where friends get together to have a true movie star experience!"
