

What other people are saying about Intraceuticals

Patrick H. Bitter Sr MD.
Founder, Epi Center MedSpa
California, USA

"We have nothing but excellent clinical and cosmetic results using the Intraceuticals Oxygen Therapy. Initially we were using the treatments indicated by the manufacturer as a stand alone. Once we discovered its soothing and hydrating component to the skin, we began incorporating this treatment into our PhotoFacial sm Elite protocol. The treatment works well post chemical peel for sun damaged skin. Its hydrating and lightening components are a compliment to the results of the chemical peel as well as post fractional resurfacing".

Patrick H. Bitter Sr., MD , Founder Epi Center MedSpa. Developer of the PhotoFacial Treatment Protocol. World-recognized Cosmetic Dermatologist, Dr. Patrick Bitter, Sr. has been practicing in the San Francisco Bay Area for over 37 years and founded the Epi Center MedSpa along with Margaret Mitchell in 1998. As a cosmetic dermatologist, his passion is skin rejuvenation and laser technology.

In 1995, he was one of the first to purchase Intense Pulsed Light technology and began developing treatment protocols for skin rejuvenation. In 1998, Dr. Bitter went public with his research and introduced the PhotoFacialSM procedure. This treatment, also known as IPL PhotoRejuvenation, is now performed around the globe.
