

## What other people are saying about Intraceuticals

---

**Patty B. Bunch**  
Celebrity Makeup Artist  
California, USA

Patty B. Bunch's go to treatment for firm, lifted, luminous red carpet-ready skin –

“As a prominent Hollywood make-up artist, I am responsible for some of Hollywood's best known and most ‘seen’ faces. Great skin is the foundation for great photos and high definition cameras – Intraceuticals Oxygen Infusions are my ‘go to treatment’ for firm, lifted, luminous red-carpet-ready skin. Since introducing Patricia Heaton to Intraceuticals on the set of FOX Television's ‘Back To You’, her skin texture has changed radically. Maintaining Patricia's camera-ready glow is easy – one 30 minute Intraceuticals Infusion prior to the taping of every show.”

Patty's work has enhanced the beauty and glamour of some of the most respected actors in Hollywood. She is in constant demand by producers, directors and network executives and has worked on some of the most well-known shows of the past three decades including: Who's the Boss, Designing Women, Married With Children, Caroline in the City and Will & Grace.

One of her Emmy nominations was for her work on HBO's, 61\*, which was directed by Billy Crystal, her client of 20 years. Patty has also worked extensively with Patricia Heaton, Geena Davis, Reba McEntire, Halle Berry, Julie Bowman, Jennifer Aniston and her long time friend, Dixie Carter.
