

Steven R. Cohen M.D. F.A.C.S
Plastic Surgeon
California, USA

"We are experiencing outstanding results utilizing the O2 Intraceuticals Hyperbaric Oxygen Therapy as an adjunct to Fraxel laser treatment. There is a visual and dramatic reduction of erythema and edema when treated immediately following laser vs. patients without. The patient experiences a cooling, calming and re-hydration of the epidermis and 50 - 70% faster recovery time. An unexpected benefit was the complete removal of Opti Guide Blue from the skin. Patients have increased comfort, a better aesthetic appearance and are enthusiastic to come back for their follow-up treatment.

Apprehension regarding completing their Fraxel treatment schedule has nearly been eliminated. Building the O2Intraceuticals protocol into our Fraxel treatment packages has ensured patient satisfaction, optimum treatment results and increased profitability. We highly recommend adding this adjunct therapy to your medical practice."

Steven R. Cohen, M.D., F.A.C.S. has pioneered the use of Fraxel Laser on the West Coast and has acted as a consultant to his colleagues regarding its effectiveness. Dr. Steven Cohen was selected by Castle Connolly as one of the Top Doctors in America, an honor bestowed on less than 1% of physicians. In addition, he has been voted by his peers as one of the best plastic surgeons in San Diego for five years.

Dr. Cohen was recently voted by San Diego Union-Tribune Readers Poll "San Diego Best 2008 Cosmetic Surgeon."
