Summer Pick-me-ups

Intraceuticals Clarity Infusion

Breakouts can clear out: **Clarity Infusion** acne-fighting treatment is here. From the creators of Madonna's favorite oxygen facial, **Intraceuticals**, this treatment penetrates the deeper layers of the skin to shrink pores and prevent inflammation without the need for an invasive procedure. The line consists of a gel cleanser, a targeted blemish-repair pen and a soothing gel that helps skin recover from the irritation of breakouts. So next time acne attacks ... wait, there won't be a next time.
