

Hotel Saint-Barth Isle De France Proudly Introduces New Spa Partnerships

Natura Bissé and Intraceuticals Sign-On to
Provide Renewed Spa Experience.

... Alongside Natura Bissé, the Spa at Isle de France will also be working with [Intraceuticals](#), a results-driven oxygen treatment designed to transform skin layer by layer ...

St Barth Isle de France has long been a haven of relaxation for guests, combining the simplicity and charm of the West Indies with the elegance and sophisticated style of the south of France ... Partnering with Natura Bissé and [Intraceuticals](#) furthers the hotels commitment to providing the ultimate in relaxation and the latest in skincare technology...

Intraceuticals: Infusions and take-home products' cutting-edge technologies sprung from extensive scientific research at leading universities in Australia and are used worldwide to visibly improve skin concerns such as aging, severely dry skin, uneven skin tone and sensitive skins. The Infusion is recognized as the premiere oxygen treatment, using therapeutic-grade oxygen and Hyaluronic Acid – an ingredient naturally found in the skin – to deliver specialized active serums deep to the skin the skin. Through breakthrough science, the treatments and take-home products create immediate, dramatic effects and accumulative, long-term changes resulting in younger, firmer and lifted skin...
