

## THE MIRACLE FACIAL

Posted 18th August, 2011

**Intra**ceuticals celebrity cult facial sees instant results and everyone in Hollywood is hooked on it.

Madonna, Victoria Beckham, Eva Longoria, Fergie, Jessica Stam and Naomi Campbell are all fans. Models use it before fashion shows and actresses before shoots. In fact, rumour has it that the names of the celebrities that don't use it can be placed on a post-it. What are we talking about? **Intra**ceuticals facial.

This facial has a celebrity cult following that would make an Elton John party proud, and how it works is impressive too. Oxygen ... delivers deep into the skin (without the use of a needle) a rejuvenating serum that contains lightweight Hyaluronic Acid, which instantly hydrates the skin's cells resulting in radiant skin and reduced fine lines.

But of course, the real reason why the Hollywood set love it is because the results are instantly noticeable.

After one appointment the skin looks and feels as if it has had years knocked off.

So, we couldn't be more pleased that finally the treatment has made its way to London.
