PRODUCT OBSESSION: INTRACEUTICALS ATOXELENE LINE WAND

I've been meaning to write about INTRACEUTICALS for a long time as I've been hearing more and more exciting things about them.

This is a line of some seriously high-tech skin products: anti-aging, botanicals, clarifier's, etc...

Intraceuticals is featured in many high profile spas, by leading plastic surgeons, dermatologists and cutting edge aestheticians around the world and also, many right here in town like the amazing Terri Lawton.

I went straight for the ATOXELENE LINE WAND as anything that has to do with lines, wrinkles, etc, in my friend. Here's a bit about it:

Atoxelene Line Wand contains a concentrated skin smoothing complex that targets expression lines and wrinkles without loss of facial expression. Smooths and visibly reduces fine lines and wrinkles without pain or injections in a portable, take anywhere applicator. Apply to affected areas around forehead, eyes and smile lines. Use twice daily. Optimum results achieved in 30 days.

With just one Atoxelene Infusion® your expression lines will visibly soften. For maximum benefits repeat infusions are recommended weekly for the first six weeks. Expression lines become smoother, firmer and visibly reduced, eye contour more defined and lips plumped. Maintain this positive change with an Atoxelene Infusion® every four to six weeks.

HOW THE INFUSION WORKS

An **Intraceuticals** Atoxelene Infusion® harnesses three elements to achieve instant and dramatic results:

A. Oxygen under light pressure aids delivery of age defying actives to the deeper layers of the skin at the same time as cooling and calming the skin.

B. Unique Atoxelene Serum contains lightweight Hyaluronic Acid and a powerful combination of Vitamins and antioxidants in addition to Argireline. The Hyaluronic Acid helps to instantly hydrate the skin resulting in increased firmness, reduced fine lines, and improved facial contours. Argireline provides the magic to specifically target expression lines and provide increased firmness, smoother fine lines and wrinkles.

C. Treatment Support Products provide essential layers to seal in and supplement skin nutrients for maximum synergistic effect and longer lasting results.

HYALURONIC LAYERING

The lightweight Hyaluronic Acid in the Atoxelene Serum is absorbed quickly by the skin for maximum dispersion of nutrients. Atoxelene Line Wand with multi-weight Hyaluronic Acid offers a concentrated formula that moisturizes the skin's surface and can be repeated throughout the day to achieve the ultimate hydration for specific expression line areas. The Atoxelene range may also be used in conjunction with Rejuvenate and Opulence products.

I'm really loving my wand and think it's a perfect way to try out the line.
