Oxygen Skin Centre: Oxygen Infusion Facial

Oxygen Skin Centre uses **Intra**ceuticals Infusions as their 'oxygen facials'

Last month, Oxygen Skin Centre opened their second store in Docklands and I was privileged to be invited to the joint. (Their original store is in Port Melbourne.)

What really caught my attention was the Oxygen facials they offer. Madonna and Kylie Minogue are known fans of these treatment! So when the lovely therapist, Tina offered a complimentary Oxygen Infusion Facial I jumped on the offer. Tina started with providing sarong for me to change into and shower caps to keep my hair tidy! Yay to no more post-facial ugly fringe hair!

She cleansed my skin thoroughly and uses a warm towel to open the pores. (The feeling of warm towel on face and neck = bliss!) Next, an ampule serum were used in conjunction with a misting gun and was misted all over my face and neck.

Then, my face and neck were blasted with oxygen to infuse the serum into my skin. It didn't feel pain or uncomfortable at all. It was just cool air being blasted all over the face and because it was so soothing, I may or may not have fallen asleep during the process. (All I can say is I really love my sleeps.)

Then, I was given an oxygen tube place in my nose to deeply inhale some oxygen while Tina work her magic in giving my a head massage for 10 minutes and it was all over too quickly!

Overall, I am very impressed with the facial. My skin was glowing and looking very healthy and plumped. While, Tina wore a pair of gloves throughout the facial which is a little unusual from my experience but it definitely helps to keep things hygienic. I highly recommend this treatment if you want instant radiance looking skin prior to an event/big day out. This is definitely a quick fix for good looking skin a la Madonna and it only takes 45 minutes to achieve.
